Factoring Numbers

Finding Factors Hint: Use a 100 chart.

Factoring Numbers Example: 15 - The numbers you can multiply to get 15 are its factors. 3 x 5 = 15, therefore 3 and 5 are the factors of 15. Another way to find factors is to put the number of items into a pile and see how many different ways you can evenly distribute items into groups.

Name the factors for each number:

1. 1 =
2. 7 =
3. 3 =
4. 109 =
