

Science Project Ideas

- How many numbers can you remember?
- Is smiling contagious?
- Are some can openers better than others? (Do some leave metal residue in food?)
- Does practice make perfect?
- Do girls or boys find Where's Waldo Pictures faster?
- Do people with longer legs walk faster?
- Do people with longer legs jump farther?
- Does water spin the same way (right or left) with every toilet flush?
- Can people tell the difference between real and fake foods? (Peanut butter and wow or soy butter, eggs and artificial eggs etc.) with a blind taste test.
- Can you heat water using the sun?
- Is the splatter of an egg larger when it's dropped higher from the ground?
- Does distilled water work better or worse on growing plants?
- What's the best natural cleaner of rust?
- What makes sugar cubes dissolve the fastest?
- Do plants grow better with salt water?
- Are horoscopes accurate?
- Do males or females have a better sense of smell?
- Is pulse affected by different types or volumes of music?
- Do some breads grow mold faster?
- Does the sun fade some colors faster than others?
- What materials keep an ice cube from melting?
- Do males react faster than females?
- Can younger people hold their breath longer than older people?
- Are some paper towels more absorbent than others?
- Are some toothpastes better at whitening than others?
