

# What is a Community?

A community is a group of people who live together in the same place. It can be a town, a city, or even a neighborhood. In a community, people work together to help each other and make their home a nice place to live.

In a community, there are many different kinds of people. There are families with children, teachers who help us learn, doctors who keep us healthy, and firefighters who keep us safe. We also have stores where we can buy food and toys, parks where we can play, and schools where we can learn new things.

Everyone in a community has a job to do to make it a great place. We all help each other and be kind to one another. That's what makes a community special!

Remember, a community is where we live together and take care of each other. We are all part of a community, and together we make it a wonderful place to be!

## Questions:

1. What are 2 places you go to in your community?
2. What is a special place in your community?
3. What do you like about your community?
