

Four Seasons

The sun controls Earth's weather.
The sun controls Earth's seasons.

1. When one part of the world has summer, the other has winter.
2. In number 2, the northern hemisphere has summer and the southern hemisphere has winter.
3. In number 3, the northern hemisphere has winter and the southern hemisphere has summer.
4. Seasons happen because the earth takes a year to travel around the sun.

Questions:

1. Which hemisphere do you live in?
2. What is the weather like for each of your seasons?
3. Explain why seasons are opposite on each hemisphere.
