

# Create a Documentary

Documentaries are like a movies, but they are real, not made-up. They show real places, people and events. Documentaries can be about many things like nature, history, science, people, animals or places to name a few. For this task, provide an outline for a documentary that you would like to create. *(Cell phones can be used to record documentaries or the documentaries can be live with slide shows.)*

**Topic:**

**Why is this important?**

**How will the topic be introduced?**

**What interesting facts will you share?**

**What photos or visuals will you need?**

**Will you need to interview people? What questions will you ask?**

**How will you conclude and summarize your documentary?**
