In each line of text below there is one word that has been misspelled. Circle the misspelled word and then write the correct spelling of the word on the line on the right side of the page.

All Abot Spring

1. _____

Spring is one of the four seasons. Spring fallls after the winter saison and before the summer season. All four of the seasons are determined by the chang in sunlight. In the Northern Hemisphere, spring beginse on either March 19th, March 20th, or March 21ste depending on the year. However, in the Southern Hemisphere, sprng falls between September and November. Sprng is also caled the Vernal Equinox which means equal nights. Thas is because the days and nights are approximately equl everywhere which means there are about 12 hours of night and 12 howrs of daylight. The sun rises earlier and cets later in the spring.
